Health Advice Upon Returning from Rio 2016 Olympic and Paralympic Games

Zika virus infection and other mosquito-borne diseases	Apply mosquito repellent for at least 21 days upon return. If feeling unwell, e.g. rash, fever, travellers should seek prompt medical advice, and provide travel details to doctor.
Sexual transmission of Zika virus and related adverse pregnancy outcomes	2 months: Consider abstinence from sex for at least 2 months upon return, or else condoms should be used. 6 months: Traveller who diagnosed with Zika virus infection or has compatible symptoms upon return, should consider abstinence from sex for at least 6 months upon onset, or else condoms should be used. 2/6 months: Women preparing for pregnancy are advised to continue to adopt contraception for at least 2 months upon return if they have no symptoms of Zika virus infection, or 6 months if one or both members of the couple are symptomatic. Traveller should abstain from sex with the pregnant partner upon return, or else use condoms throughout the pregnancy. 6 months: Traveller should use condom for at least 6 months upon return if the female partner may get pregnant.
Other infections	Travellers should seek prompt medical advice when having other symptoms such as diarrhoea, abdominal pain, and provide travel details to doctor.
