

**Table 2: Examples of Successful Overseas PRS**

<b>Country [PRS Programme]</b>	<b>Achievement (year)</b>	<b>PRS Arrangement</b>
Norway [Waste Electrical and Electronic Equipment (WEEE)]	Recovery Rate over 90% (by weight) (2004)	Under the PRS for WEEE, manufacturers/importers are obliged to ensure that the EEE they introduce on the Norwegian market are collected when they end up as waste, and are recycled or otherwise properly handled. They are also obliged to arrange for the collection of WEEE from distributors/retailers and local authorities free of charge.
Alberta, Canada [Tyres]	Collection exceeded target of that year by 14% (2004-05) <sup>Note 1</sup>	An advance disposal fee of C \$4/tyre is imposed on the sale of new tyres. The fee is channeled to the Tire Recycling and Management Fund being operated, which is used to finance the collection, transportation and recycling of old tyres, public information/ awareness and research.

**Note:**

1. The results indicated that all recoverable tyres are collected and recycled and the backlog that had been built up over a number of years could also be cleared.
