Notes : \* Provisional figures.

- (1) The value index of restaurant receipts for periods prior to Q2 2006 is compiled by re-scaling the 1999/2000-based series to a basis comparable to the 2004/05-based series. The conversion factor is derived from the average values of the two index series in an overlapping period.
- (2) The volume index of restaurant receipts is compiled by adjusting the value of restaurant receipts for price changes. The relevant components of the 2004/05-based Composite Consumer Price Index are used as deflators from Q4 2004 onwards.
- (3) From Q4 2005 onwards, the year-on-year rates of change of volume index of restaurant receipts are derived from the 2004/05-based series.
