Notes :

- (1) In accordance with the Balance of Payments accounting rules, a positive value for the balance figure in the current account represents a surplus whereas a negative value represents a deficit. For the capital and financial account, a positive value indicates a net capital and financial inflow and a negative value indicates a net outflow. As increases in external assets are debit entries and decreases are credit entries, a negative value for net change in reserve assets represents a net increase and a positive value represents a net decrease.
- (2) The estimates on net change in reserve and non-reserve assets under the Balance of Payments framework are transaction figures. Effects from valuation changes (including price changes and exchange rate changes) and reclassifications are excluded.
- (3) In principle, the net sum of credit entries and debit entries is zero. In practice, discrepancies between the credit and debit entries may however occur for various reasons as the data are collected from different sources. Equality between the sums of credit entries and debit entries is brought about by the inclusion of a balancing item which reflects net errors and omissions.

Notes :

- (1) In accordance with the Balance of Payments accounting rules, a positive value for the balance figure in the current account represents a surplus whereas a negative value represents a deficit.
- (2) In a Balance of Payments account, every external transaction is presented by two entries, a credit and a debit. In the current account, exports of goods and services, factor income inflows and transfers from abroad are all credit entries, while imports of goods and services, factor income outflows and transfers to abroad are debit entries.

Notes :

- (1) In accordance with the Balance of Payments accounting rules, a positive value for the balance figure in the current account represents a surplus whereas a negative value represents a deficit. For the capital and financial account, a positive value indicates a net capital and financial inflow and a negative value indicates a net outflow. As increases in external assets are debit entries and decreases are credit entries, a negative value for net change in reserve assets represents a net increase and a positive value represents a net decrease.
- (2) The estimates on net change in reserve and non-reserve assets under the Balance of Payments framework are transaction figures. Effects from valuation changes (including price changes and exchange rate changes) and reclassifications are excluded.
