Notes:

1. The base period for the Consumer Price Indices is October 2004 to September 2005.
2. The CPI(A), CPI(B) and CPI(C) are compiled with reference to the average expenditure patterns for different groups of households as obtained from the Household Expenditure Survey. By aggregating the expenditure patterns of all households covered by the above three indices, a Composite CPI is also compiled. The CPI(A), CPI(B) and CPI(C) respectively cover some 50%, 30% and 10% of households in Hong Kong. The average monthly household expenditures (in HK\$) of these groups in the base period (that is October 2004 to September 2005) were \$4000 to \$15499, \$15500 to \$27499 and \$27500 to \$59999 respectively. The Composite CPI covers 90% of households, which had an average monthly household expenditure of \$4000 to \$59999 in the same period.
Taking into account the impact of price changes since the base period, the monthly household expenditure ranges

of the CPI(A), CPI(B), and CPI(C) adjusted to the price level of 2007 are broadly equivalent to \$4100 to \$16100, \$16100 to \$28900 and \$28900 to \$63200 respectively, and that of the Composite CPI is broadly equivalent to \$4100 to \$63200.

3. Apart from 'Private housing rent' and 'Public housing rent', the 'Housing' section also includes 'Management fees and other housing charges' and 'Materials for house maintenance'.
4. 'Public housing rent' is not a constituent of the CPI(C).
5. Apart from 'Educational services', 'Telephone and other communications services' and 'Medical services', the 'Miscellaneous services' section also includes other miscellaneous services.
6. 0% denotes a figure within +0.05% and -0.05%.
