Notes :

1. In collecting views on the quarter-to-quarter changes, if the variable in question may be subject to seasonal variations, respondents are asked to provide the expected changes after excluding the normal seasonal variations.
2. Responses on expected changes are expressed in terms of three categories. The percentages for the three response categories may not add up to 100% owing to rounding.
3. Survey results are generally presented as "net balance", i.e. the difference between the percentage of respondents choosing "up" over that choosing "down". The "net balance", with its appropriate sign, indicates the direction of expected change in the variable concerned. A positive sign indicates a likely upward trend while a negative sign, a likely downward trend.
4. Accommodation and food services sector mainly covers services rendered by hotels and restaurants.
5. Real estate sector covers real estate development, leasing, brokerage and agency, maintenance management, and other real estate services.
6. Professional and business services sector covers legal, accounting and other professional, scientific and technical services, and administrative and support services.
