The quarter-to-quarter rate of change in business receipts indices of Computer and information technology services based on the seasonally adjusted series in Q2 2011 was -5.2%.

Note 1 The quarter-to-quarter rates of change in the business receipts indices of all service industries/domains based on the seasonally adjusted series in Q2 2011 and those of the tourism, convention and exhibition services domain in Q1 2011 were provisional figures.

Note 2 The quarter-to-quarter rates of change in the business receipts indices (BRIs) of selected service industries/domains are derived based on the seasonally adjusted series to reflect the underlying trend of business receipts. These seasonally adjusted BRIs are compiled using the X-12 ARIMA method, which is a standard method applied in compiling seasonally adjusted statistical data series.

Note 3 Seasonally adjusted series may be revised as more data become available. The seasonally adjusted BRIs will be revised annually when the figures for the first quarter of the current year are published.

Note 4 The BRIs of a few service industries including Financing (except banking), Financial markets and asset management, Asset management and Insurance are found to have no identifiable seasonality in the seasonal adjustment exercise. Seasonal adjustment is therefore not applied to the BRIs of these industries.
