Notes:

1. The base period for the Consumer Price Indices is October 2009 to September 2010.
2. The CPI(A), CPI(B) and CPI(C) are compiled with reference to the average expenditure patterns for different groups of households as obtained from the Household Expenditure Survey. By aggregating the expenditure patterns of all households covered by the above three indices, a Composite CPI is also compiled. The CPI(A), CPI(B) and CPI(C) respectively cover some 50%, 30% and 10% of households in Hong Kong. The average monthly household expenditures (in HK\$) of these groups in the base period (that is October 2009 to September 2010) were \$4500 to \$18499, \$18500 to \$32499 and \$32500 to \$65999 respectively. The Composite CPI covers 90% of households, which had an average monthly household expenditure of \$4500 to \$65999 in the same period.
3. Apart from 'Private housing rent' and 'Public housing rent', the 'Housing' section also includes

'Management fees and other housing charges' and 'Materials for house maintenance'.

4. 'Public housing rent' is not a constituent of the CPI(C).

5. Apart from 'Educational services', 'Information and communications services' and 'Medical services', the 'Miscellaneous services' section also includes other miscellaneous services.

6. 0% denotes a figure within +0.05% and -0.05%.
