Table 2 Title : Proportion of working population with place of work in same district

Proportion of male working population with place of work in same district for Hong Kong Island was 25.6%.
Proportion of female working population with place of work in same district for Hong Kong Island was 24.8%.
Proportion of working population with place of work in same district for Hong Kong Island was 25.2%.
Proportion of male working population with place of work in same district for Central and Western District Council District was 39.6%.
Proportion of female working population with place of work in same district for Central and Western District Council District was 32.9%.
Proportion of working population with place of work in same district for Central and Western District Council District was 36.2%.
Proportion of male working population with place of work in same district for Wan Chai District Council District was 24.4%.
Proportion of female working population with place of work in same district for Wan Chai District Council District was 21.2%.
Proportion of working population with place of work in same district for Wan Chai District Council District was 22.8%.
Proportion of male working population with place of work in same district for Eastern District Council District was 22.9%.
Proportion of female working population with place of work in same district for Eastern District Council District was 24.3%.
Proportion of working population with place of work in same district for Eastern District Council District was 23.6%.
Proportion of male working population with place of work in same district for Southern District Council District was 18.7%.
Proportion of female working population with place of work in same district for Southern District Council District was 20.5%.
Proportion of working population with place of work in same district for Southern District Council District was 19.6%.

Proportion of male working population with place of work in same district for Kowloon was 16.2%.
Proportion of female working population with place of work in same district for Kowloon was 20.0%.
Proportion of working population with place of work in same district for Kowloon was 18.0%.
Proportion of male working population with place of work in same district for Yau Tsim Mong District Council District was 24.7%.
Proportion of female working population with place of work in same district for Yau Tsim Mong District Council District was 27.8%.
Proportion of working population with place of work in same district for Yau Tsim Mong District Council District was 26.2%.
Proportion of male working population with place of work in same district for Sham Shui Po District Council District was 14.5%.

Proportion of female working population with place of work in same district for Sham Shui Po District Council District was 18.0%.

Proportion of working population with place of work in same district for Sham Shui Po District Council District was 16.2%.

Proportion of male working population with place of work in same district for Kowloon City District Council District was 13.9%.

Proportion of female working population with place of work in same district for Kowloon City District Council District was 14.7%.

Proportion of working population with place of work in same district for Kowloon City District Council District was 14.3%.

Proportion of male working population with place of work in same district for Wong Tai Sin District Council District was 8.1%.

Proportion of female working population with place of work in same district for Wong Tai Sin District Council District was 12.5%.

Proportion of working population with place of work in same district for Wong Tai Sin District Council District was 10.2%.

Proportion of male working population with place of work in same district for Kwun Tong District Council District was 19.6%.

Proportion of female working population with place of work in same district for Kwun Tong District Council District was 25.6%.

Proportion of working population with place of work in same district in Kwun Tong District Council District was 22.5%.

Proportion of male working population with place of work in same district for New Territories was 12.2%.

Proportion of female working population with place of work in same district for New Territories was 16.9%.

Proportion of working population with place of work in same district for New Territories was 14.5%.

Proportion of male working population with place of work in same district for Kwai Tsing District Council District was 12.7%.

Proportion of female working population with place of work in same district for Kwai Tsing District Council District was 17.5%.

Proportion of working population with place of work in same district for Kwai Tsing District Council District was 15.0%.

Proportion of male working population with place of work in same district for Tsuen Wan District Council District was 13.2%.

Proportion of female working population with place of work in same district for Tsuen Wan District Council District was 17.1%.

Proportion of working population with place of work in same district for Tsuen Wan District Council District was 15.2%.

Proportion of male working population with place of work in same district for Tuen Mun District Council District was 19.2%.

Proportion of female working population with place of work in same district for Tuen Mun District Council District was 25.7%.

Proportion of working population with place of work in same district for Tuen Mun District Council District was 22.2%.

Proportion of male working population with place of work in same district for Yuen Long District Council District was 7.9%.

Proportion of female working population with place of work in same district for Yuen Long District Council District was 12.0%.

Proportion of working population with place of work in same district for Yuen Long District Council District was 9.8%.

Proportion of male working population with place of work in same district for North District Council District was 12.6%.

Proportion of female working population with place of work in same district for North District Council District was 19.4%.

Proportion of working population with place of work in same district for North District Council District was 15.8%.

Proportion of male working population with place of work in same district for Tai Po District Council District was 12.0%.

Proportion of female working population with place of work in same district for Tai Po District Council District was 18.2%.

Proportion of working population with place of work in same district for Tai Po District Council District was 15.0%.

Proportion of male working population with place of work in same district for Sha Tin District Council District was 12.0%.

Proportion of female working population with place of work in same district for Sha Tin District Council District was 16.0%.

Proportion of working population with place of work in same district for Sha Tin District Council District was 13.9%.

Proportion of male working population with place of work in same district for Sai Kung District Council District was 8.2%.

Proportion of female working population with place of work in same district for Sai Kung District Council District was 11.1%.

Proportion of working population with place of work in same district for Sai Kung District Council District was 9.6%.

Proportion of male working population with place of work in same district for Islands District Council District was 14.1%.

Proportion of female working population with place of work in same district for Islands District Council District was 19.7%.

Proportion of working population with place of work in same district for Islands District Council District was 16.9%.

Proportion of male working population with place of work in same district in for the Whole Territory was 15.8%.

Proportion of female working population with place of work in same district for the Whole Territory was 19.3%.

Proportion of working population with place of work in same district for the Whole Territory was 17.5%.

Note : Persons who work in the same district include: (a) those who live on Hong Kong Island or in Kowloon and work in the same District Council District; (b) those who live in a new town and work in the same new town; and (c) those who live in other areas in the New Territories and work in areas other than new town areas of the same District Council District. Persons who work at home and marine population are excluded.

Table 3 Title : Proportion of persons attending full-time courses in educational institutions in Hong Kong with place of study in same district

Proportion of persons attending full-time courses in educational institutions in Hong Kong with place of study in same district for Hong Kong Island was 56.3%.

Proportion of persons attending full-time courses in educational institutions in Hong Kong with place of study in same district for Central and Western District Council District was 56.9%.

Proportion of persons attending full-time courses in educational institutions in Hong Kong with place of study in same district for Wan Chai District Council District was 51.7%.

Proportion of persons attending full-time courses in educational institutions in Hong Kong with place of study in same district for Eastern District Council District was 58.7%.

Proportion of persons attending full-time courses in educational institutions in Hong Kong with place of study in same district for Southern District Council District was 52.8%.

Proportion of persons attending full-time courses in educational institutions in Hong Kong with place of study in same district for Kowloon was 57.0%.

Proportion of persons attending full-time courses in educational institutions in Hong Kong with place of study in same district for Yau Tsim Mong District Council District was 51.5%.

Proportion of persons attending full-time courses in educational institutions in Hong Kong with place of study in same district for Sham Shui Po District Council District was 59.1%.

Proportion of persons attending full-time courses in educational institutions in Hong Kong with place of study in same district for Kowloon City District Council District was 62.9%.

Proportion of persons attending full-time courses in educational institutions in Hong Kong with place of study in same district for Wong Tai Sin District Council District was 51.7%.

Proportion of persons attending full-time courses in educational institutions in Hong Kong with place of study in same district for Kwun Tong District Council District was 58.1%.

Proportion of persons attending full-time courses in educational institutions in Hong Kong with place of study in same district for New Territories was 56.5%.

Proportion of persons attending full-time courses in educational institutions in Hong Kong with place of study in same district for Kwai Tsing District Council District was 53.1%.

Proportion of persons attending full-time courses in educational institutions in Hong Kong with place of study in same district for Tsuen Wan District Council District was 51.0%.

Proportion of persons attending full-time courses in educational institutions in Hong Kong with place of study in same district for Tuen Mun District Council District was 76.3%.

Proportion of persons attending full-time courses in educational institutions in Hong Kong with place of study in same district for Yuen Long District Council District was 48.8%.

Proportion of persons attending full-time courses in educational institutions in Hong Kong with place of study in same district for North District Council District was 60.7%.

Proportion of persons attending full-time courses in educational institutions in Hong Kong with place of study in same district for Tai Po District Council District was 59.9%.

Proportion of persons attending full-time courses in educational institutions in Hong Kong with place of study in same district for Sha Tin District Council District was 54.8%.

Proportion of persons attending full-time courses in educational institutions in Hong Kong with place of study in same district for Sai Kung District Council District was 49.7%.

Proportion of persons attending full-time courses in educational institutions in Hong Kong with place of study in same district for Islands District Council District was 63.5%.

Proportion of persons attending full-time courses in educational institutions in Hong Kong with place of study in same district for the Whole Territory was 56.6%.

Note : Persons who study in the same district include: (a) those who live on Hong Kong Island or in Kowloon and study in the same District Council District; (b) those who live in a new town and study in the same new town; and (c) those who live in other areas in the New Territories and study in areas other than new town areas of the same District Council District.
