

Table 6

	Number of applications received	Number of applications approved	Subsidies approved (HK\$ million)	Content and details	Number of buildings provided with subsidies	Effectiveness
2009	798	124	36.91	To subsidise works in the buildings concerned to improve energy efficiency of their building services installations, including lighting, electrical, air-conditioning and lift and escalator installations.	So far over 5,600 buildings have been granted subsidies.	It is estimated that all the projects approved so far can save 150 million units of electricity and reduce carbon dioxide emissions by about 105,000 tonnes annually.
2010	277	351*	160.69			
2011	254	197*	107.21			
2012 (before close of applications)	442	107*	50.71			
Total	1771	779	355.52
