Note : Since Sinopec operates the business of piped domestic LPG for less than 3 years, only data from May 2010 to October 2012 could be provided.

ExxonMobil

As explained by ExxonMobil Hong Kong Limited (EMHK), it sells piped LPG to the pipeline operators, rather than to the end consumers direct. The actual selling price to the end consumers is in turn determined by the pipeline operators. The piped LPG price is one of the commercial terms with EMHK's operators, and is therefore confidential and proprietary in nature. EMHK is hence unable to make public the requested information.
