

Annex 3

Year	2008	2009	2010	2011	2012
Number of waste separation bins (set)	10 570	12 560	14 580	15 100	15 670

Note:

1. Waste separation bins usually contain three bins per set. The all-in-one bins now placed on the streets have several compartments to hold different recyclables. As for those in the country parks, one to three types of recyclables will be collected.
2. Management companies of housing estates will provide additional recovery facilities and other recovery arrangements on their own to suit the situation of individual housing estates and the need of owners/occupants.
