## Notes

- \*Include “Biological Sciences”, “Physical Sciences”, “Mathematical Sciences” and “Computer Science and Information Technology”.
- Since some UGC-funded programmes are mapped to more than one academic programme category (APC), the number of students of these programmes is counted across the APCs concerned on a pro rata basis. Thus, the student numbers of some APCs are presented in decimal figures. In the above table, the relevant figures are rounded to the nearest whole number. As such, figures may not add up to the corresponding totals.
- <sup>^</sup>To tie in with the implementation of the new academic structure, UGC-funded institutions have admitted two cohorts of students under the old and new academic structures in the 2012/13 academic year.
