

LCQ11: Tables in answer part

Table A

Cycle	Number of electors who registered for the first time (A)	Number of electors who re-registered (B)	Total number of newly registered electors (C) = (A) + (B)
2012	135 099	12 986	148 085
2013	46 982	9 639	56 621
2014	71 102	6 159	77 261

The statistical breakdown of the total number of newly registered electors (i.e. column (C)) according to District Council delineation, age groups and gender is set out in the Annex. However, the REO does not have further breakdown of the figures as set out in the Annex according to whether the electors were registered for the first time or re-registered.

Table B

Reason of removal and number of electors \ Cycle	2012	2013	2014
Failure to respond to statutory inquiry procedures	218 199	26 281	13 740
Death	22 324	24 591	26 863
Others (such as voluntary de-registration, loss of Hong Kong permanent resident status)	1 896	527	295
Total	242 419	51 399	40 898

The REO has no breakdown of electors by reasons of de-registration according to District Council delineation and age groups.
