

## Annex I to LCQ 6

Annual Averages of Air Pollutants (in  $\mu\text{g}/\text{m}^3$ ) recorded by General Air Quality Monitoring Stations on Both Sides of the Victoria Harbour between 2012 and 2014:

Air pollutants	Annual Averages of Air Pollutants ( $\mu\text{g}/\text{m}^3$ )		
	2012	2013	2014
<b>Sulphur Dioxide</b>			
Central & Western District	9	11	9
Eastern District	7	7	6
Kwai Chung	16	20	21
Kwun Tong	11	12	11
Sham Shui Po	13	14	14
Tsuen Wan	16	16	15
<b>Respirable Suspended Particulates (Annual Limit = <math>50 \mu\text{g}/\text{m}^3</math>)</b>			
Central & Western District	46	49	44
Eastern District	38	43	37
Kwai Chung	42	46	41
Kwun Tong	43	52	51
Sham Shui Po	42	46	44
Tsuen Wan	42	47	42
<b>Fine Suspended Particulates (Annual Limit = <math>35 \mu\text{g}/\text{m}^3</math>)</b>			
Central & Western District	29	33	28
Eastern District	25	28	26
Kwai Chung	29	32	28
Kwun Tong	28	33	31
Sham Shui Po	28	31	33
Tsuen Wan	29	31	28
<b>Nitrogen Dioxide (Annual Limit = <math>40 \mu\text{g}/\text{m}^3</math>)</b>			
Central & Western District	52	58	46
Eastern District	58	58	52
Kwai Chung	64	69	67
Kwun Tong	59	59	54
Sham Shui Po	68	72	65
Tsuen Wan	61	63	57
<b>Ozone</b>			
Central & Western District	37	41	43
Eastern District	40	39	43
Kwai Chung	30	30	36
Kwun Tong	40	44	46
Sham Shui Po	27	31	35
Tsuen Wan	32	33	39

Remarks:

- (1) Shaded rows are the annual averages of pollutants recorded at the Kwai Chung Air Quality Monitoring Station.
- (2) No annual limits are established on the annual averages of air quality objectives for sulphur dioxide and ozone. Only the 10-minute limit ( $500 \mu\text{g}/\text{m}^3$ ) and 24-hour limit ( $125 \mu\text{g}/\text{m}^3$ ) are established for sulphur dioxide and an 8-hour limit ( $160 \mu\text{g}/\text{m}^3$ ) is established for ozone.
