

Test Results of Water Samples Taken from Kindergartens and Schools

The Government is now taking drinking water samples by batches from kindergartens as well as public sector and direct subsidy scheme primary and secondary schools built with government funding in 2005 or after to ascertain whether the lead content in the drinking water exceeds the Provisional Guideline Value (GV) at 10µg/L recommended in World Health Organization (WHO)'s Guidelines for Drinking-water Quality. Priority is given to kindergartens providing whole day or long whole day service, special schools and primary schools. The Education Bureau will release the results after the completion of the testing of each batch of water samples.

(Results released up to 21.9.2015, involving 94 kindergartens)
