

Annex II to LCQ 22

The numbers of public charging points by charging standards and electric private cars that can use these charging points are set out in the table below:

Charging speed	Conductive charging standard	Number of public charging points	Number of electric private cars that can use the charging points *
Standard	BS1363	904	2 463
Medium	IEC 62196 (less than or equal to 20 kilowatts)	142	2 392
	SAE J1772	18	255
	Others	20	1 733
Quick	CHAdEMO**	11	1 983
	GB 20234.2	40	51
	CCS DC Combo**	3	398
	IEC 62196 (exceeding 20 kilowatts)**	27	2 392
	Others	36	1 688

* A particular model of electric private cars may use different types of public chargers, including the use of charger plug adaptors.

** Applicable to multi-standard quick chargers.
