

**Hourly traffic volumes and volume/capacity ratios of the
Tsing Ma Bridge (eastbound and westbound)
during morning and evening peak hours
on weekdays between 2014 and 2016**

Year	Peak hours ^{Note 1}	Traffic volume (Number of vehicles per hour)	Volume/Capacity (V/C) ratio ^{Note 2}
2014	Morning (eastbound)	1 880	0.4
	Morning (westbound)	2 990	0.6
	Evening (eastbound)	3 050	0.6
	Evening (westbound)	2 140	0.5
2015	Morning (eastbound)	2 030	0.4
	Morning (westbound)	3 270	0.7
	Evening (eastbound)	3 320	0.7
	Evening (westbound)	2 220	0.5
2016	Morning (eastbound)	2 090	0.4
	Morning (westbound)	3 750	0.8
	Evening (eastbound)	3 500	0.8
	Evening (westbound)	2 360	0.5

Note 1: The morning peak hours refer to 7am to 10am; the evening peak hours refer to 4pm to 7pm (Monday to Friday, excluding public holidays).

Note 2: V/C ratio is an indication of the traffic conditions of roads during peak hours. A v/c ratio equals to or less than 1.0 is considered acceptable. A v/c ratio between 1.0 and 1.2 indicates a manageable degree of congestion. A v/c ratio above 1.2 indicates more serious congestion.
