

**Motion to be put by the HKSAR Government
to the Legislative Council
on implementing the Toll Adjustment Proposal**

Regarding the Government's proposal to adjust the tolls of private cars, taxis and motorcycles for using the three road harbour crossings with effect from 1 January 2020 ("Toll Adjustment Proposal") with a view to rationalising cross-harbour traffic which will bring about benefits to society as a whole, with expected benefits including alleviating cross-harbour traffic congestion, reducing the obstruction of non-cross-harbour traffic by cross-harbour traffic queues, saving the commuting time for citizens using public transport and reducing emission from vehicles, etc., this Council supports the Government to introduce into this Council legislative amendments relating to the Cross-Harbour Tunnel and Eastern Harbour Crossing for the implementation of the Toll Adjustment Proposal, and to seek funding approval from the Finance Committee for the Western Harbour Crossing Toll Compensation Scheme.
