

**Overall number of elders who have received pneumococcal vaccination
under the Government Vaccination Programme (GVP) and the Vaccination Subsidy Scheme (VSS) and their uptake rates**

Target group	Vaccination scheme		2017/18		2018/19		2019/20	
			No. of persons vaccinated	<u>Accumulative percentage of population in the age group vaccinated</u> ⁺	No. of persons vaccinated	<u>Accumulative percentage of population in the age group vaccinated</u> ⁺	No. of persons vaccinated(as at 1 December 2019)	<u>Accumulative percentage of population in the age group vaccinated</u> ⁺
Persons aged 65 or above	GVP	23-valent pneumococcal polysaccharide vaccine (23vPPV)	3 300	38% [#]	26 200	40% [*]	8 000	Relevant data not available
		13-valent pneumococcal conjugate vaccine (PCV13)	165 900 ^{^1}		74 800 ^{&1}		19 300 ^{~1}	
	VSS	23vPPV	16 600		19 100		7 000	
		PCV13	20 600 ^{^2}		12 800 ^{&2}		3 600 ^{~2}	
	Total:		206 400		132 900		37 900	

^{^1} Among them, 60 100 doses were administered through respective vaccination scheme to new turn-up elders, while another 105 800 doses were administered as mop-up dose to elders who had already received 23vPPV.

- ^{^2} Among them, 7 000 doses were administered through respective vaccination scheme to new turn-up elders, while another 13 600 doses were administered as mop-up dose to elders who had already received 23vPPV.
- ^{&1} Among them, 29 000 doses were administered through respective vaccination scheme to new turn-up elders, while another 45 800 doses were administered as mop-up dose to elders who had already received 23vPPV.
- ^{&2} Among them, 6 000 doses were administered through respective vaccination scheme to new turn-up elders, while another 6 800 doses were administered as mop-up dose to elders who had already received 23vPPV.
- ^{~1} Among them, 9 300 doses were administered through respective vaccination scheme to new turn-up elders, while another 10 000 doses were administered as mop-up dose to elders who had already received 23vPPV.
- ^{~2} Among them, 1 700 doses were administered through respective vaccination scheme to new turn-up elders, while another 1 900 doses were administered as mop-up dose to elders who had already received 23vPPV.
- ⁺ It refers to the accumulative percentage of surviving elders who have received at least one dose of 23vPPV or PCV13 under the scheme.
- [#] The relevant figures are calculated based on the accumulative number of persons vaccinated (excluding those deceased) as at September 30, 2018.
- ^{*} The relevant figures are calculated based on the accumulative number of persons vaccinated (excluding those deceased) as at February 28, 2019.
