Note :

1. The computer system of FEHD does not keep record of the relevant information. In view of the large number of contracts involved and the need to check individual cases or files at different district or team offices, more time is required to compile the requested data. The numbers of non-skilled workers who may benefit from the new measures under the respective cleansing, security, and related services of cemeteries, crematoria & columbaria contracts are 3 700, 240 and 20 respectively.
2. As at December 31, 2019, contractors had not applied for any reimbursement of the top-up payment or contractors' applications were being processed.
3. Under the transitional arrangement, taking into account the additional administrative cost incurred by the service contractors as a result of contract variation and implementation of the related measures, as a one-off special measure, the Government will reimburse the administrative cost of the contractors, pitching at 25% of the actual payment incurred by the contractors for the payment of the three measures for their non-skilled workers. The administrative cost is excluded from the top-up payment amounts in this Annex.
