

表二 二零二一年一月的氣象數據與距平  
Table 2 Figures and Departures from Normal - January 2021

| 氣象要素<br>Meteorological Element                 | 本月數據<br>Figure of<br>the month                | 距平<br>Departure from normal<br>(1991-2020)                          | 距平<br>Departure from normal<br>(1981-2010)                          |
|--|---|---|---|
| 平均日最高氣溫<br>Mean Daily Maximum Air Temperature  | 19.3 °C                                       | 比正常高 0.6 °C<br>0.6 °C above normal                                  | 比正常高 0.7 °C<br>0.7 °C above normal                                  |
| 平均氣溫<br>Mean Air Temperature                   | 16.2 °C                                       | 比正常低 0.3 °C<br>0.3 °C below normal                                  | 比正常低 0.1 °C<br>0.1 °C below normal                                  |
| 平均日最低氣溫<br>Mean Daily Minimum Air Temperature  | 13.8 °C                                       | 比正常低 0.8 °C<br>0.8 °C below normal                                  | 比正常低 0.7 °C<br>0.7 °C below normal                                  |
| 平均露點溫度<br>Mean Dew Point Temperature           | 8.5 °C  | 比正常低 3.2 °C<br>3.2 °C below normal                                  | 比正常低 2.9 °C<br>2.9 °C below normal                                  |
| 平均相對濕度<br>Mean Relative Humidity               | 62 %  | 比正常低 12 %<br>12 % below normal                                      | 比正常低 12 %<br>12 % below normal                                      |
| 平均雲量<br>Mean Cloud Amount                      | 47 %  | 比正常低 15 %<br>15 % below normal                                      | 比正常低 14 %<br>14 % below normal                                      |
| 總雨量<br>Total Rainfall                          | 微量<br>Trace                                   | 比正常低 33.2 毫米<br>33.2 mm below normal                                | 比正常低 24.7 毫米<br>24.7 mm below normal                                |
| 總日照時間<br>Total Bright Sunshine Duration        | 小時<br>217.3 hours                             | 比正常高 71.5 小時<br>71.5 hours above normal                             | 比正常高 74.3 小時<br>74.3 hours above normal                             |
| 平均每日太陽總輻射<br>Mean Daily Global Solar Radiation | 兆焦耳/米 <sup>2</sup><br>14.43 MJ/m <sup>2</sup> | 比正常高 3.88 兆焦耳/米 <sup>2</sup><br>3.88 MJ/m <sup>2</sup> above normal | 比正常高 4.26 兆焦耳/米 <sup>2</sup><br>4.26 MJ/m <sup>2</sup> above normal |
| 總蒸發量<br>Total Evaporation                      | 毫米<br>87.9 mm                                 | 比正常高 18.8 毫米<br>18.8 mm above normal                                | 比正常高 16.6 毫米<br>16.6 mm above normal                                |

附註 : 除日照、太陽輻射及蒸發量在京士柏氣象站記錄外，其他數據均在天文台錄得。  
 Remarks: All measurements were made at the Hong Kong Observatory except sunshine, solar radiation and evaporation which were recorded at King's Park Meteorological Station.

Trace means rainfall less than 0.05 mm  
 微量表示少於 0.05 毫米
