

Data on students with VI and HI and all students studying at S6 level in the past three years are listed in the following table:

Type of Special Educational Needs (SEN)	No. of S6 Students 【No. of S5 Students in the Previous School Year】 (Percentage)*		
	2008/09 School Year	2009/10 School Year	2010/11 School Year
	VI	4 【13】 (30.8%) ^a	4 【10】 (40.0%)
HI	19 【66】 (28.8%)	20 【80】 (25.0%)	21 【93】 (22.6%)
All students	26 091 【70 035】 (37.3%)	25 898 【70 473】 (36.8%)	26 043 【71 455】 (36.5%)

* The percentage is calculated by dividing the number of S6 students in public sector schools by the number of S5 students in the previous year.

^a For example, there were 13 S5 students with VI in the 2007/08 school year and 4 were studying at S6 level in the 2008/09 school year. Therefore, the percentage is 30.8% ($4 \div 13 \times 100\%$).
