

The retention and attrition of NETs in primary and secondary schools in the past three school years:

|   |           | Primary School   | Secondary School |
|---|-----------|--|------------------|
| Number of NETs who left the NET Schemes                   | 2010/2011 | Not available at the moment as the school year has not yet come to a close |                  |
|   | 2009/2010 | 56   | 64               |
|   | 2008/2009 | 59   | 34               |
| Average years of service of NETs who left the NET Schemes | 2010/2011 | EDB does not keep this information   |                  |
|   | 2009/2010 |  |                  |
|   | 2008/2009 |  |                  |
| Retention Rate of NETs <sup>@</sup>                       | 2010/2011 | Not available at the moment  |                  |
|   | 2009/2010 | 84%  | 79%              |
|   | 2008/2009 | 76%  | 81%              |
| Attrition rate of NETs <sup>#</sup>                       | 2010/2011 | Not available at the moment  |                  |
|   | 2009/2010 | 16%  | 21%              |
|   | 2008/2009 | 24%  | 19%              |

<sup>#</sup> The attrition rate is defined as the percentage of the number of NETs leaving the NET Schemes on completion of contract out of the total number of NETs completing the contract in that particular school year.

<sup>@</sup> Retention rate is calculated as the difference between the total and the attrition rate of that particular year.
