1 Only covers the utilisation rate of CCCs attached to kindergartens.

2 Given the low utilisation rate of MHCCCs and that SWD has provided additional resources to regularise and extend NSCCP (a similar service but with greater flexibility) to all 18 districts, SWD has no plan to further expand the service of MHCCCs.

3 SWD captures service utilisation by counting the number of children using the service in each month. One child is counted only once in the month.
