Notes : Individual figures may not add up to the total due to rounding.

- (1) In accordance with the accounting rules adopted in compiling Balance of Payments, a positive value for the balance figure in the current account represents a surplus whereas a negative value represents a deficit. In the capital and financial account, a positive value indicates a net financial inflow while a negative value indicates a net outflow. As increases in external assets are debit entries and decreases are credit entries, a negative value for the reserve assets represents a net increase while a positive value represents a net decrease.
- (2) The estimates of reserve and non-reserve assets under the Balance of Payments framework are transaction figures. Effects of valuation changes (including price changes and exchange rate changes) and reclassifications are not taken into account.
- (3) In principle, the net sum of credit entries and debit entries is zero. In practice, discrepancies between the credit and debit entries may occur for various reasons as the relevant data are collected from many sources. Equality between the sum of credit entries and that of debit entries is brought about by the inclusion of a balancing item which reflects net errors and omissions.

Notes : Individual figures may not add up to the total due to rounding.

(1) In accordance with the accounting rules adopted in compiling Balance of Payments, a positive value for the balance figure in the current account represents a surplus whereas a negative value represents a deficit.

(2) In a Balance of Payments account, every external transaction is recorded by two entries, a credit and a debit. In the current account, exports of goods and services, primary income inflows and secondary income inflows are all credit entries, while imports of goods and services, primary income outflows and secondary income outflows are debit entries.

Notes : Individual figures may not add up to the total due to rounding.

(1) In accordance with the accounting rules adopted in compiling Balance of Payments, a positive value for the balance figure in the capital and financial account indicates a net financial inflow while a negative value indicates a net outflow. As increases in external assets are debit entries and decreases are credit entries, a negative value for the reserve assets represents a net increase while a positive value represents a net decrease.

(2) The estimates of reserve and non-reserve assets under the Balance of Payments framework are transaction figures. Effects of valuation changes (including price changes and exchange rate changes) and reclassifications are not taken into account.
