

**Statistics related to epidemiological investigation
of the Universal Community Testing Programme**

(as at 3pm of September 15)

Table 1: Testing results

(1) Preliminary positive specimens received by Department of Health (DH)	46
(2) Specimens handled by DH	46
(a) Specimens confirmed to be positive upon confirmatory test	45
(i) Specimens of new confirmed cases	32
(ii) Specimens of confirmed cases identified through DH's contact tracing	5
(iii) Specimens of known recovered cases	8
(b) Specimens with quantity insufficient for confirmatory test	1

Table 2: Epidemiological analysis of new confirmed cases

(1) Source / epidemiological linkage	
Local case with unknown source	20 (63%)
Cases that are epidemiologically linked to other local cases	12 (38%)
(2) Symptomatic	
With symptoms	19 (59%)
Without symptoms	13 (41%)
(3) Number of close contacts traced	
Confirmed cases identified from close contacts	5

Table 3: Demographical analysis of new confirmed cases

(1) Gender	
Male	14 (44%)
Female	18 (56%)
(2) Age profile	
20-39	7 (22%)
40-54	6 (19%)
55-64	10 (31%)
65-79	5 (16%)
80 or above	4 (13%)
(3) District of residence	
Tuen Mun	11 (34%)
Yau Tsim Mong	6 (19%)
Kwai Tsing	3 (9%)
Yuen Long	3 (9%)
Wong Tai Sin	2 (6%)
Islands	1 (3%)
Kowloon City	1 (3%)
Kwun Tong	1 (3%)
North	1 (3%)
Sai Kung	1 (3%)
Sha Tin	1 (3%)
Tsuen Wan	1 (3%)
