

**Summary of death cases reported as
suspected adverse events following immunisation of COVID-19 vaccines
between April 19 and May 2, 2021**

Table 1: Cases with history of COVID-19 vaccines within 14 days prior to death

Age	Gender	Date of death	Past medical history	Autopsy findings	Causality assessment
43	Male	22/4	History of hyperlipidemia and obesity.	Preliminary autopsy findings of coronary artery disease.	Preliminary not associated with vaccination.
66	Female	22/4	Unknown medical history.	Preliminary autopsy findings of ruptured myocardial infarction.	Preliminary not associated with vaccination.
58	Female	23/4	History of hypertension and obesity.	Preliminary autopsy findings of subarachnoid haemorrhage.	Preliminary not associated with vaccination.
63	Male	26/4	History of hyperlipidemia.	Preliminary autopsy findings of ischaemic heart disease.	Preliminary not associated with vaccination.
57	Male	2/5	History of hypertension, chronic obstructive pulmonary disease and obesity.	Preliminary autopsy findings of coronary artery disease.	Preliminary not associated with vaccination.

Table 2: Cases with history of COVID-19 vaccines more than 14 days prior to death

Age	Gender	Date of death	Past medical history	Autopsy findings	Causality assessment
75	Male	24/4	History of hypertension and diabetes.	Preliminary autopsy findings of ischaemic heart disease.	Preliminary not associated with vaccination.
74	Female	25/4	History of pulmonary fibrosis, osteoporosis and gastritis.	Attending doctor(s) considered cause of death was pneumonia and no clinical reason to suspect association with vaccine. Autopsy not required.	No causal relationship with vaccination.
76	Male	26/4	History of hypertension, diabetes and hyperlipidemia.	Attending doctor(s) considered cause of death was intracranial haemorrhage and no clinical reason to suspect association with vaccine. Autopsy not required.	No causal relationship with vaccination.
58	Female	30/4	History of myelofibrosis and nasopharyngeal carcinoma. Bronchoscopy performed on 29/4.	Autopsy pending	Preliminary not associated with vaccination.
