Notes: (1) The projections of school-age population **residing in Hong Kong** are compiled based on the 2019-based Population Projections released by the Census and Statistics Department (C&SD) in September 2020 and the “Projections of Population Distribution 2021 – 2029” released by the Planning Department in March 2021. The projections have taken into account a number of factors and assumptions. Any deviations in the assumptions from the eventual situation may render the projected figures different from the actual turnout figures.

(2) School-age population aged 6 is considered appropriate for primary education (i.e. Primary 1).

(3) Figures refer to the projected number of local children (i.e. Hong Kong usual residents) aged 6 residing in the districts concerned. The projected figures should not be taken as the projected number of students attending schools in the districts concerned. The latter would be affected by the prevailing distribution of school places, demand for school places and parental choices. Students under or over the age of 6 may also enrol at primary education (i.e. Primary 1).

(4) Figures are rounded to the nearest hundred and may not add up to the respective totals due to rounding.
