

(Photo 1) The Hong Kong Observatory has added real-time weather photos taken at Tai Mo Shan to its website starting from today (August 19). Photo shows scenery captured by the new camera on a fine day in which fine weather cumulus clouds can be seen over Lantau Island.

(Photo 2) The Hong Kong Observatory has added real-time weather photos taken at Tai Mo Shan to its website starting from today (August 19). The bottom left corner refers to a weather photo taken by the new camera at Tai Mo Shan, which clearly shows cumulonimbus clouds over the seas to the south of Lantau Island. The inset in the upper right corner shows an associated rainband captured on the weather radar image at the same time.

(Photo 3) The Hong Kong Observatory has added real-time weather photos taken at Tai Mo Shan to its website starting from today (August 19). Photo shows a sea of clouds in twilight captured by the new camera.

(Photo 4) The Hong Kong Observatory has added real-time weather photos taken at Tai Mo Shan to its website starting from today (August 19). Photo shows lenticular clouds captured by the new camera.
