**Hon Tony TSE's motion on
“Reforming the tendering system to support local enterprises”**

Wording of the Motion

That this Council urges the Government to reform the tendering and procurement systems of various policy bureaux, departments, public organizations and subvented organizations, including introducing elements to support local enterprises, avoiding “bundled tenders”, placing more emphasis on creativity and innovation, further reducing the weighting given to the “lowest bid wins” criterion, and determining the “lowest reasonable cost” for various types of tenders to eradicate “cut-throat bidding”, so as to actively support the development of local small and medium enterprises.
