Note :

- (1) In HA, day inpatient refer to those who are admitted into hospitals for non-emergency treatment and who are discharged within the same day. Inpatient are those who are admitted into hospitals via Accident & Emergency Department or those who have stayed for more than one day.
- (2) HA organises clinical services on a cluster basis. The patient journey may involve different points of care within the same cluster. Hence, information by cluster provides a better picture than that by hospital on service utilisation.
- (3) In view of the emergence of the Coronavirus Disease 2019 epidemic in Hong Kong since early 2020, HA has adjusted its services in response to the

epidemic. This should be taken into account when comparing the throughput of services provided by HA across the years.

Abbreviations

Specialty

GYN – Gynaecology

MED – Medicine
