Note :

- (1) Specialist outpatient (clinical) attendances also include attendances in nurse clinics in specialist outpatient setting.
- (2) HA organises clinical services on a cluster basis. The patient journey may involve different points of care within the same cluster. Hence, information by cluster provides a better picture than that by hospital on service utilisation.
- (3) Individual figures may not add up to the figure for all specialties because the figure includes attendances of other specialties apart from the major specialties as listed in the table.
- (4) In view of the emergence of the Coronavirus Disease 2019 epidemic in Hong Kong since early 2020, HA has adjusted its services in response to the epidemic. This should be taken into account when comparing the throughput of services provided by HA across the years.
