**Ir Hon Gary ZHANG's motion on
"Enhancing the performance of public transport services"**

Wording of the Motion

That public transport is closely related to the daily lives of the people, and the performance of public transport services such as railway and buses has drawn much attention in recent years; in this connection, this Council urges the Government to reform the regulatory system for public transport services through measures including: formulating afresh the service indicators, as well as improving the incident reporting and information dissemination mechanisms to enhance the public's right to know, thereby effectively monitoring and enhancing the performance of public transport services.
