**Prof Hon William WONG's motion on
"Formulating an AI Plus strategy"**

Wording of the Motion

That as artificial intelligence ('AI') with unstoppable development in recent years will become an important engine driving the development of new quality productive forces, and the Central Government's Report on the Work of the Government announced this year also mentions for the first time the launch of an AI Plus initiative, this Council urges the SAR Government to consider formulating an AI Plus strategy for the strategic planning and development of AI application, so as to lead Hong Kong's development into an advanced city excelling in the research and development ('R&D') as well as the application of AI; to promote Hong Kong's connection and integration with other cities in the Greater Bay Area in the R&D and application of AI; to fully utilize AI to enhance the efficiency of the SAR Government and foster AI application in various trades and industries in order to create a favourable ecological environment, bring fresh impetus to the economy and in turn enhance people's quality of life; and to motivate individuals and enterprises to keep abreast of technological development, so that they can benefit from AI development rather than being eliminated by the strong tides of AI.
