Note :

Overall, the service volume for follow-up patients scheduled for follow-up and patients with episodic diseases each account for about half among general out-patient attendances.

In view of the COVID-19 epidemic outbreak in Hong Kong in early 2020, the Hospital Authority (HA) adjusted its services to cope with the epidemic. This should be taken into consideration when comparing the service capacity of the HA in previous years. With the subsiding of the local COVID-19 epidemic situation and cessation of various anti-epidemic measures in early 2023, the HA

gradually resumed provision of all of its public healthcare services to tie in with the Government's resumption of normalcy measures.
