**Ir Hon Gary ZHANG's motion on
“Enhancing regulation of the safety of construction works”**

Wording of the Motion

That the construction industry is an important driving force for Hong Kong's economic and social development, but a number of serious construction accidents in recent years have aroused public concern about the safety of construction works; in this connection, this Council urges the Government to reform the regulatory system for construction works through measures including driving the industry forward to establish a professional safety monitoring system that keeps abreast of the times, clearly defining the relationship of roles and responsibilities among various stakeholders and enhancing safety awareness.
