**Hon Dominic LEE's motion on
“Enhancing the transport network and community facilities
at Pak Shek Kok”**

Wording of the Motion

That the area around Pak Shek Kok and the Hong Kong Science Park has developed rapidly, but transport infrastructure planning is lagging behind, with unclear planning for the Pak Shek Kok Station of the East Rail Line; and there is also a serious lack of community halls, libraries, as well as recreational, sports and cultural facilities in the area; in this regard, this Council urges the Government to immediately announce the detailed planning and design scheme as well as the construction timetable for the Pak Shek Kok Station, and concurrently develop a multi-modal linkage system, and to adopt a public-private partnership approach to expedite the planning and construction of various community facilities, so as to ensure the early provision of both transport infrastructure and living facilities.
