Appendix 1
Key Information of the Smart and Green Mass Transit System (SGMTS)
in Hung Shui Kiu/Ha Tsuen (HSK/HT) New Development Area (NDA) Phase 1 Project

The SGMTS in HSK/HT NDA is about 16 kilometres in length, most of which are dedicated roads, plying through the HSK/HT and Yuen Long South (YLS) NDAs. The system will adopt a green road-based mode without the need for physical rail tracks. It will be implemented in phases to cater for the traffic and transport demand of the different stages of development of the HSK/HT and YLS NDAs. Phase 1 of the system is about 4.5 kilometres in length with seven proposed at-grade stations with a view to tying in with the Second Phase Development of HSK/HT NDA. Phase 1 of the system will connect Nai Wai to the vicinity of the Logistics, Enterprise and Technology Quarter in HSK/HT NDA, passing through the town centre and residential area of the NDA, and connecting to MTR Tuen Ma Line Hung Shui Kiu Station, Light Rail Nai Wai Stop and the Hong Kong-Shenzhen Western Rail Link (Hung Shui Kiu-Qianhai) under planning. It will provide the public with convenient feeder services to travel to various districts of Hong Kong.
