Notes:

- Number of tenders not awarded includes tender exercise having no tenders received and tender exercise which was cancelled. .

2. In calculating the number of successful bids and the number of tenders not awarded, we adopt the financial year in which the contracts were awarded as the basis. Accordingly, contracts awarded in a given financial year may have been tendered in the preceding financial year. As such, the total number of tenders invited in a particular financial year does not necessarily equal the sum of the number of successful bids and the number of tenders not awarded in that financial year.
3. With regard to contracts carried out by non-governmental organisations, the above data only cover contracts with value exceeding HK\$50 million. For contracts with value of HK\$50 million or below, we do not maintain their relevant information and are therefore unable to provide those information.
