**Prof Hon William WONG's motion on
“Empowering all industries through ‘Artificial Intelligence Plus’ to
promote the development of digital economy and smart society”**

Wording of the Motion

That artificial intelligence (‘AI’) is bringing about paradigm shifts across multiple areas of the economy and society; the Outline of the 15th Five-Year Plan stipulates fully implementing the ‘AI+’ initiative, strengthening the integration of AI with technological innovation, industrial development, cultural construction, people’s livelihood, and social governance, and seizing the commanding heights of AI industrial applications; in this connection, this Council urges the Government to formulate proactive ‘AI+X’ policies to promote the deep integration of AI with different fields and industries (‘X’), with specific measures including subsidizing research on the restructuring of production processes, assisting different fields in developing vertical large models, increasing research and development funding for AI applications related to scientific research, industries and people’s livelihood, strengthening the training of interdisciplinary AI talents, and enhancing AI literacy among the general public, so as to empower all industries with AI, and strengthen human-AI collaboration and cross-sectoral integration, thereby comprehensively promoting the development of the digital economy and smart society and enhancing Hong Kong’s new quality productive forces.
