Notes:

Figures in brackets refer to the quarter-to-quarter % changes in the seasonally adjusted GDP in real terms.

The volume estimates of GDP and its components for 2025, which were previously valued at 2023 prices, have been revalued at 2024 prices. This rebasing of the volume measures affects the real growth rates of the annual and quarterly GDP for 2025.

\* Figures are compiled based on the change of ownership principle in recording goods sent abroad for processing and merchandising under the standards stipulated in the *System of National Accounts 2008*.

r Revised figures. These "revised figures" are still subject to further revision later on when more data are incorporated.
